WORK EXPERIENCE

Full Stack Developer & Co-Founder | May 2024 - Present

DesignUrWeb Inc

- Co-founded and managed a web development agency specializing in modern, scalable websites for small businesses.
- Led full-stack development, delivering custom solutions using PHP, WordPress, and JavaScript alongside a skilled team.
- Developed tailored WordPress themes and plugins optimized for SEO, responsiveness, and user engagement.
- Oversaw testing, quality assurance, and ongoing technical support to ensure high performance and reliability.

Full Stack Web Developer | Jan – Aug 2024

Ministry of Public and Business Service Delivery and Procurement, Government of Ontario • Led Scrum meetings and collaborated on projects using Feature Branch CI/CD workflows with Azure DevOps for code quality management.

- Developed REST APIs implementing Microsoft Graph and GitHub CLIs for seamless data integration across Azure platforms.
- Integrated Advanced Security Enablement features using Azure and GitHub to enhance project security frameworks.
- Spearheaded the OPS Job Bot for OPS Hackathon 2024 using Microsoft Power Apps and Power Pages, achieving Top 5 placement.
- Migrated legacy applications from .NET 4.6.2 to .NET Core 8, improving performance, security, and scalability.

Full Stack Developer | Jan 2023 – Aug 2023

FeedbackSession IO

- Independently maintained Frontend and Backend systems, ensuring consistent functionality and performance.
- Conducted quality assurance testing and implemented automated tests to improve overall product reliability.

TECHNICAL PROJECTS

ITS Federated Health Hockey Playoff Pool (React, NodeJS, MySQL) | [Website](#)

- Redesigned and rebuilt the UI using React, improving user experience and reducing load times by implementing component-based architecture.
- Integrated Firebase Authentication for secure user login and MySQL database for managing player stats, team rosters, and playoff predictions.
- Implemented real-time scoring updates, draft functionality, and leaderboard features while resolving critical bugs affecting data synchronization.
- Deployed and maintained the full-stack application using Node.js backend with RESTful API endpoints.

Secure Password Management Software (Python) | [Github](#)

- Developed a client-server password management system using Python socket programming with daemon process architecture.
- Implemented AES-256 encryption for secure password storage and master password authentication to prevent unauthorized access.
- Built multi-client support allowing concurrent connections through threaded socket server handling multiple user sessions.
- Integrated password strength validation, automatic password generation, and secure credential retrieval features.

Capstone Project (React-Native) | [Github](#)

- Developed a cross-platform mobile application using React Native to help users track fitness goals and maintain healthier lifestyles.
- Implemented features including profile customization, workout planning, calorie tracking, weight monitoring, and progress visualization.
- Integrated local storage for persistent data and built custom UI components for seamless user experience across iOS and Android.
- Collaborated in an Agile team environment, participating in sprint planning and code reviews throughout the development lifecycle.

EDUCATION

Honours Bachelor of Technology – Software Development | 2019 - 2024

Seneca Polytechnic | **4.0 GPA** | Toronto, ON

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) - Feb 2025

- Demonstrates foundational knowledge of cloud concepts, Azure Services, security and compliance
